Building Partnerships in Healthcare

It's
care
that makes us
a leader..

Comcare Home Health Services

Comcare provides home support, professional nursing, rehabilitative therapies and other specialized services in the home, school and workplace utilizing recognized standards. Comcare was the first Canadian home health care provider to achieve the national Canadian Council on Health Services Accreditation (CCHSA) three-year unconditional accreditation. Comcare has maintained a reputation as the industry leader by receiving a second unconditional three-year CCHSA accreditation.

We focus on solutions that maximize independence while providing the necessary health and social support to our clients and their families. Delivering services consistent with values of respect, dedication, reliability, responsiveness and integrity is what makes Comcare a leader in community health services. Specialized services include community based clinical trials and program specific assessment services.

Goals are set individually in collaboration with the client and their individual care giver(s). We believe in the team approach, wherein client services are delivered with care, flexibility and compassion specific to their individual and often unique needs.

Each Comcare location is supported by its own 24 hour, seven day a week local On-call centre. This not only guarantees local access; it is aimed to provide our clients with the assurance that Comcare is truly committed to exceeding their needs and expectations.

Comcare Employer Health Services

More and more, employers in Canada take a keen interest in the health of their employees. The relationship between health, productivity and profitability is well documented. Comcare's occupational health professionals can work on a special project basis, or create a fully customized program by assessing employer and employee needs, designing an industry specific health program and collaborating on implementation. Comcare places great emphasis on the confidentiality of employee information.
